

SPIRITUAL HELP *for* EVERYDAY LIFE

w/ **INGRID AUER®**

MORE THAN JUST ONE GUARDIAN ANGEL

As people of the 21st century live in a time where huge advancements in technology, science and research are coupled with a strong drive for power and success. But, almost simultaneously, we long more and more for a return to our true nature, our essence and therefore for a spirituality that is an innate part of our soul.

Many of us want close and direct communication with the spiritual world, a return to heavenly realms while on earth, without subjugation to already established rules, laws or so called "truths". Humanity is awakening to a new consciousness that has never been lived in quite the same way.

Through the help of our spiritual allies, like angels, Ascended Masters, or other benevolent beings we are offered new and exciting opportunities for spiritual and personal growth.

DORIS KLOMFAR

resides in Vienna, Austria. She receives angelic messages and expresses her creativity as an author and painter. On an energetic level she is there for humans, animals and Mother Earth – and she is an enthusiastic Jin Shin Jyutsu practitioner and self-help teacher! As a child already, as far as she can think back, she has been able to see and feel beings who guide and aid humans, animals and even plants. She can read the hearts of people and senses their thoughts, worries and fears and is aware of their contradictions. This ability has posed a huge challenge for her in daily life and is an ongoing one.

Doris has lived through some intense times and can understand and relate to people with issues and disharmonies. It is all a learning process to love life just as it is and look at it with affection and courage. She is grateful to see the world through her own eyes and give her heart to it. She is in touch with everything and everybody. She is one of us, just like you!
